A POEM

OUR SUB – COUNTY

I love our sub-county,
A sub-county full of hills and valleys,
Which make it nice-looking,
To everyone from North to South,
And from East to West

I Love our sub-county
A sub-county with churches and mosques,
In all directions,
Where people go to worship God,
And get blessings!

I love our sub-county
A sub-county where the sun
Rises in the morning,
And sets in the evening,
Oh! Long live our sub-county.

A STORM IN NTYAZO VILLAGE

My name is Muyanja. I live in Ntyaza Village.

Last month, our sub-county was hit by a heavy storm.

The heavy storm destroyed schools, homes, crops and animals. Transport became very difficult because the bridge connecting to Ntuusi broke down. All roads were full of mud and there were many accidents.

The sub-county chief visited our village to see the challenges caused by the heavy storm. The chief held a meeting with the people of the area to get possible solutions.

All of them agreed to work together to fix the bridge. The chief gave in the money to buy materials for the work. The people of the area brought sand and water. At the end of everything, the bridge was put back and people moved again freely.

THE RAIN CYCLE

The rain is the process through which water is renewed. The rain cycle describes how water evaporates from the surface of the earth, rises into the atmosphere, cools and condenses into rain or snow clouds and falls again to the surface as rain.

On the earth, water is found in all the three states of matter. Water can be in solid, liquid or gas state. Liquid water is found in the earth's oceans, seas, rivers, lakes and streams. Water is found even in the soil and underground.

Every day, water evaporates from water bodies and trees. This water moves up into the air and forms clouds. The clouds move up into the sky until they reach cold air. The water in evaporation turns into drops of rain and then falls back on the earth. The clouds that give us rain are called nimbus clouds. Rain helps plants to grow. People, animals and plants need water because it is life.

Questions

- What is the passage about?
- Where do we find liquid water?
- How is rain helpful to plants?
- Which clouds give us rain according to the passage?
- In how many states does water exist?
