-The school cook prepares meals for the learners and pupils

-The school askari takes care of the school learners security

### 3. What name is given to the mixture of gases.

That's Air

#### Related content

Air is the mixture of gases

Percentage composition of gases in the atmosphere

0.04% carbondioxide

0.93% argon

20.95% Oxygen

78.09% Nitrogen .This occupies the largest percentage in the atmosphere

4. In which sub county / division is your school found

Here the answer will always depend on the location of the school

**Related content.**

The political head of a sub- county is the local council iii chairperson

5. Name the main natural source of light

The main natural source of light is the sun

**Reject:** The moon because it's not even a natural source of light since it reflects heat and light from the sun.

6. Suggest any one system of a plant

The shoot system

The root system

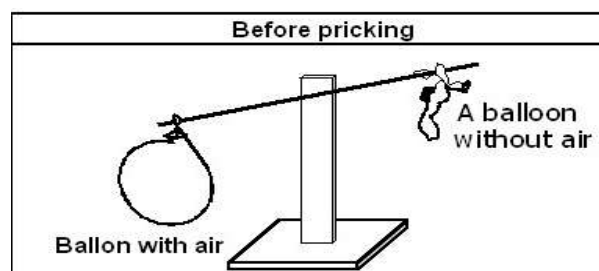

**Related content.**

Plants use small structures called stomata to breathe

Plants use roots to get water and mineral salts from the ground

Plants use roots to firmly hold in the soil

7. What property of air does the experiment below represent

The experiment above shows that air has weight

**Related content**

**Other properties of Air include;**

-Air occupies space

-Air exerts pressure

8. What is the best soil for pottery work?

Clay is the best soil for pottery work

**Related content**

Loam soil is the best for crop growing

sandy soil is the best for building houses

9.What is soil profile?

Soil profile is the vertical arrangement of soil layers from the top to the bottom

10. Which cloud is responsible for giving us rain fall?

Nimbus clouds give us rainfall

11.Give one reason why we give first Aid.

-To stop bleeding

-To reduce pain

-To save life

**Related content**

First Aid is the first treatment given to a person who has had an accident

An accident is the sudden happening which harm our bodies

A first Aider is the person who gives first a person who gives first aid

**Equipment or elements of a first aid box**

cotton wool

Razor blade

spirit

iodine

12.Suggest any one importance of food to our bodies.

To get energy

To grow

To keep healthy

**Related content**

Food is any thing good to eat or drink

Vitamins are protective foods

proteins are body building foods

Carbohydrates are energy giving foods

13. Name the gas which occupies the highest percentage in the atmosphere

That is Nitrogen

Note: for related content check number 3 above.

14.State one reason why we should shave our hair regularly?

-To keep healthy

-To look smart

-To avoid parasites like head and body lice

15.Name the gas which supports burning.

That is Oxygen

Related content

When burning charcoal holes are left at the bottom and top to allow burning

16.Name the equipment below.

It is a fire extinguisher

Related content;

Place where we find fire extinguishers,

-Schools

-Hospitals

-Big churches

-Police stations

-The gas found in the fire extinguisher is carbon dioxide

-The gas mentioned above is used in the fire extinguisher because it does not support burning

17.Suggest the gas which is used in the equipment named in number 16 above.

The gas is Carbon dioxide

18. Give the reason to support your answer in 17 above.

This is because the gas named does not support burning

19. How do schools control soil erosion in their compounds?

-By planting paspalum in the compound

-By planting trees in the compound

20. Suggest any one accident that can occur at home.

-Burn

-Scald

-Fracture

**Related content;**

-A fracture is the broken bone or limb

-A scald is an injury caused by wet heat

-A burn is an injury caused by dry heat

21. In which direction does the compass needle face while at rest?

The compass needle faces in the north while at rest

A forest is a group of trees growing together on a large piece of land

**Reject;** A collection of trees growing together.

23. Name one example of Natural Forest in Uganda.

-Mabira forest

-Bugoma Forest

-Budongo forest

-Bwindi impenetrable forest

24. Suggest any one example of man-made changes.

-Cutting down trees

-Planting trees

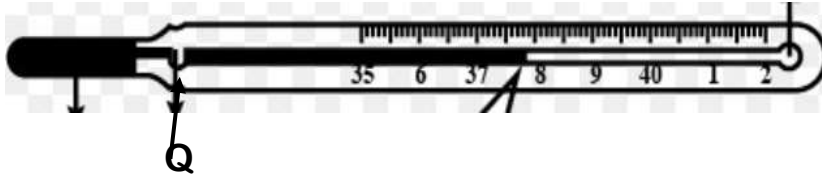

-Killing animals

25. Name the map symbol below.

The map symbol is a hill

26. Name the part marked Q on the diagram below.

-Structure Q is a Kink

-Structure Q is a constriction bend

27. How important is the structure marked Q on the instrument above?

The structure marked Q helps to prevent the back flow of Mercury

28. Name the president of the village / sub ward.

The village president is the chairperson Local Council One.

29. What are wet lands?

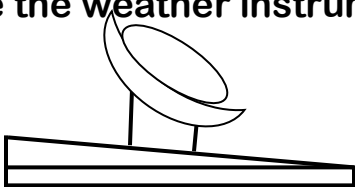

Wet lands are water logged and vegetated areas.

30. State any one local material obtained from wet lands.

-Clay soil

-Papyrus

31. Name the weather instrument below.

The instrument above is a sunshine recorder

**Related content;**

A sunshine recorder is used to measure the amount of sunshine at a given location at any time

32. Outline the reason why the steven son screen is painted white.

It's painted white to reflect sun's heat

33. What are weeds?

Weeds are unwanted plants in the garden

34. Stephen planted his cassava, why would you advise him to weed?

-To avoid competition between the crops and the weed over sun light and food nutrients

-For proper growth

-To eradicate pests that would hide in the weeds

(b) Write any three types of leaders.

- Political leaders
- Civil leaders
- Cultural leaders

43. Study the figure below and answer the question that follows.

(a) Name the parts marked;

X-Proboscis

T-Thorax

B-Spiracles

(b) How important is part X to an insect?

Part marked X is used for sucking food and water

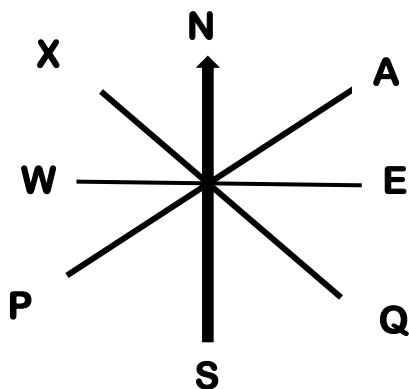

**Related content;**

-A true insect must have 3 pairs of legs (6 legs)

-Insects breath through spiracles

The reason why a spider is not called a true insect because it has two body parts and four pairs of legs (8 legs)

44. Identify the semi cardinal points labeled on the point of compass direction.

A- North East

Q- South East

P – South West

X- North West

45.(a) Define the term germs.

These are small living organisms that cause diseases

(b) Outline any three types of germs.

-Viruses

-Bacteria

-Fungi

-Protozoa

46. Draw these school symbols in the table provided.

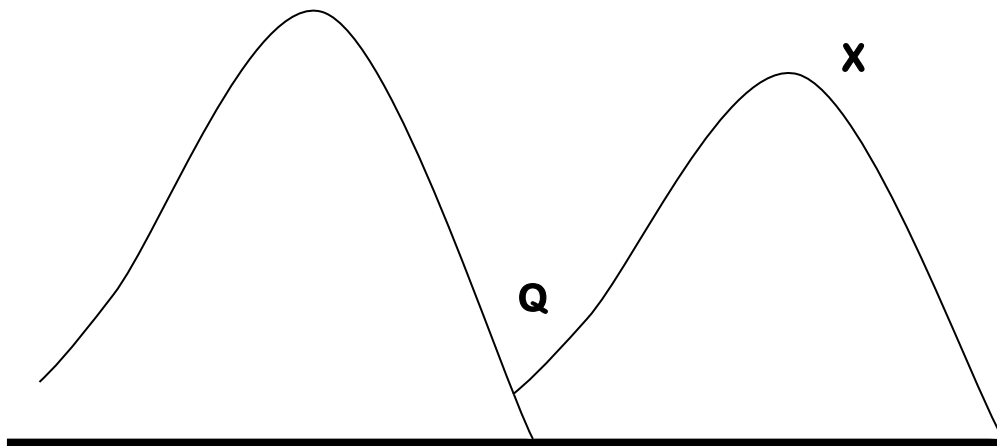

School Uniform	School Flag	School Desk	School Badge

**Note;** Mark any appropriate drawing that has matched the school symbol name

47. Match the following correctly.

- i) Store → Where food is prepared  
ii) Sick bay → Where food stuffs are kept  
iii) Class room → Where pupils learn from  
iv) Kitchen → Where pupils go for treatment

48. Study the figure below and answer the questions that follow.

(a) Name the areas marked

X-Hill

Q-Valley

(b) Which type of rainfall can be received by people around such areas of the above diagram.

The type of rainfall which can be received by the people around such areas is relief rainfall

**Related content;**

A valley is a Low land between two hills

A hill is a piece of land that rises higher than the surrounding

49.(a) What is transport?

Transport is the movement of people and their goods from one place to another

(b) Suggest any two types of transport you know.

-Road transport

-Railway transport

-Water transport

-Air transport

(c) Outline the commonest type of transport in your sub-county / division.

Road transport

50.(a) State any two ways how the school benefit from its neighborhood.

-The school gets workers from the neighbors

-The school gets money from neighbors in form of fees and doners

-The school get building materials from neighbors

(b) Suggest any two benefits of a school to the neighborhood.

-The school teach the children of the neighborhood

-The school provide employment to the neighborhood

51.(a) What is sanitation?

Sanitation is the general cleanliness of a given area.

**Reject;** (General cleanliness since it is attached to personal hygiene)

(b) State any two diseases which can result from poor sanitation.

-Dysentery

-Cholera

(c) Which vector spreads malaria parasite?

An infected Female Anopheles mosquito

**Note;**

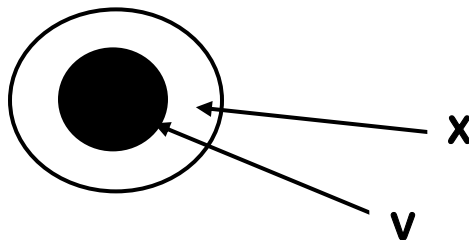

You should teach the learners that it's only infected female Anopheles mosquito which can transmit malaria parasite because the male anopheles does not feed on blood but fruits

52. Draw the weather elements listed below.

Sunny	Cloudy	Windy	Rainy

Let the learners draw the appropriate picture in the right position of the weather elements

53. Study the figure below and answer the questions that follow.

(a) Name the parts labeled X and V

X-Penumbra

V-Umbra

(b) Outline any two uses of shadows to man.

-Shadows tell time

-Shadows show direction

-Shadows give us shade

54.(a) Name the feature which covers the largest part of your sub-county.

Plateau

Note;

Whether you're from which region of Uganda, the physical feature which covers the largest part is a plateau

A plateau is a high raised flat-topped piece of land

(b) State any three importances of a plateau.

-Plateau provides land for farming

- Plateau provides land for building houses
- Plateau provides land for construction of roads
- Plateau contain drainage features which have water to help domestic work

55 Suggest any four examples of tourist attractions in your area.

- Plateau
- Valleys
- Rivers
- Industries
- Health centers
